Medical Physicist

Catalan Oncology Center Perpignan, France

IT'S NOT JUST A PRODUCT IT'S A GAME-CHANGER!

The CCO is an Excellence Center using **3 linacs**.

They are providing **2200 treatments a year** - which represents **180 patients a day** and **15 replannings** per week, a timely **20 hours** of **extra work**.

Replanning rates by anatomy

We were fortunate to jump on board as early adopters of TheraPanacea's **AdaptBox**.* This innovative solution **seamlessly integrates into our existing workflow**, as we're already avid users of **Annotate** - TheraPanacea's autosegmentation tool - on a daily basis.

Our first results are impressive, suggesting that **AdaptBox might help us reduce our replanning rate significantly up to 60%**, depending on the anatomical region. A huge time saver!

We also find great value in the level of **standardization** of our practices that **AdaptBox** brings to the table by avoiding unnecessary replanning.
